

If your computer is running low on free space, you will not be able to install important future Windows updates, and your computer's performance may be affected. Here is a great way to free space so you can keep your computer up-to-date and running smoothly.

'Storage Sense' is a great Windows tool that will auto-delete temporary files and empty you recycle bin and unnecessary downloaded files.

**Use 'Storage Sense'**  
This built-in Windows feature automatically deletes unnecessary files, such as temporary files and items in your Recycle in. To enable it, go to **START>SETTINGS > SYSTEM > STORAGE** and turn on Storage Sense. See screen shot on right.

## IMPORTANT!

If you don't know what it is, DON'T DELETE IT! Seek help instead.
